OUTDOOR LIGHTING

in-lite[®]

MORE THAN A BRAND

in-lite is more than just an outdoor lighting brand. We're a company with a mission. We do this by developing beautiful outdoor lighting fixtures but above all by inspiring as many people as possible and showing that lighting belongs in every outdoor space. And we don't do this alone. An extensive network of partners and outdoor professionals have the exact same mission. We train these professionals and inspire them with unique ways to use lighting. Together we make every outdoor space a unique place you can fully enjoy in the evenings.

Focus on simplicity
Leading and innovative

WHY IN-LITE

in-lite is the fastest-growing outdoor lighting manufacturer in the industry for a reason. Our high-quality products, patented connection system, and innovative technology are designed with professionals in mind. We are committed to helping professionals grow their outdoor lighting businesses.

EASY-LOCK

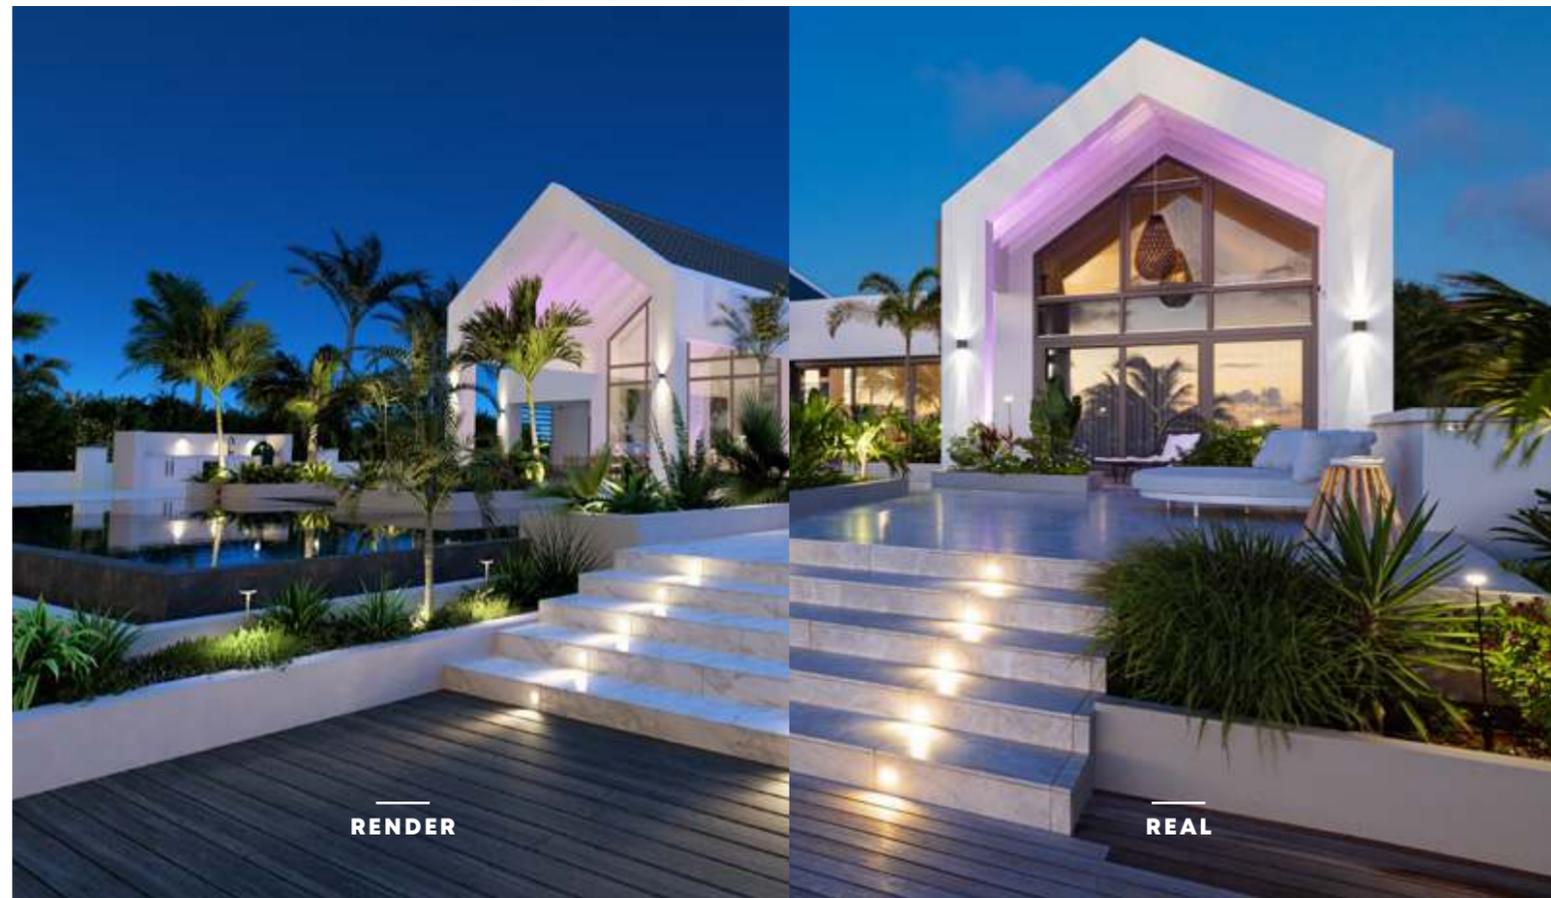

The EASY-LOCK connector is in-lite's patented connection system. The connector punctures the low voltage cable and releases a dielectric grease to create an air-tight seal by simply twisting the cap onto the body of the connector.

CRI

(COLOR RENDERING INDEX)

CRI evaluates the color rendering and accuracy of objects under manufactured light compared to how they appear under natural light (100 CRI). A higher CRI value means the light reproduces vibrant, beautiful colors more effectively. The quality of in-lite products is unmatched—we use only CRI 90+ LEDs in our fixtures to ensure superior light performance.

LIGHTING DESIGN

in-lite Studio is a specialized team of designers that can help you with lighting designs for your outdoor spaces. Whether it's a deck, a driveway, or a complete garden, in-lite Studio will make the right product choices to create the most atmospheric setting at night.

ACADEMY

As an outdoor professional, education is vital to push your projects to the next level. That's why we started in-lite Academy, the place where you can learn all there is to know about our system, fixtures, and innovations. Sign up for a training and extend your knowledge with each training.

INNOVATION

SMART LIGHTING

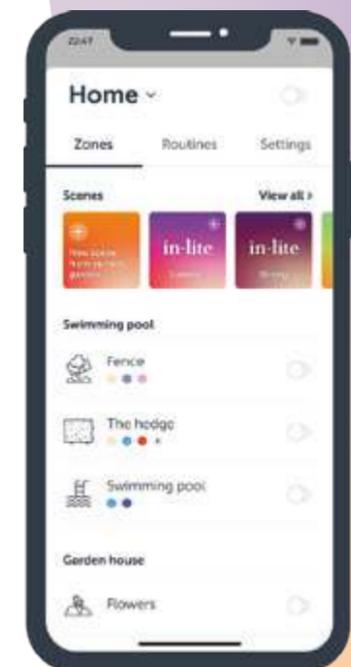

At its core, in-lite's Smart system comprises a SMART HUB and the in-lite app. The smart transformer enables you to connect up any fixture from in-lite's range and control each line using a Bluetooth Low Energy connection. Next add (individually controllable) Smart lights, such as SMART SCOPE TONE, SMART FLUX TONE and SMART EVO FLEX TONE. Thus transforming your garden into a colourful, elegant whole.

Ease of use is key to the in-lite app. Setting routines is straightforward and allows you to decide what time the lights will turn on and off. You can also add SMART MOVE wireless motion detector or an accessory like SMART BRIDGE. This enables you to integrate your Bluetooth system into your WiFi network, giving you control over your lighting anytime, anywhere. The in-lite Smart system can also be integrated into home automation systems such as Google Home, Apple HomeKit and Amazon Alexa.

Smart lighting is the future of our range. The in-lite app is continuously developing, enabling us to permanently offer Smart system users new options and optimisations such as in-lite Scenes and in-lite Energy Insight – a bespoke sustainability plan for your garden.

ACE CONCEPT

ACE is one of the most complete concepts in our product range. It offers bollards and wall lights in five different colors. This modern and simplistic concept is perfect for any outdoor space. It has a minimalistic design and a unique sleek lighting effect.

Customize the fixtures in the ACE concept with in-lite accessories that are specially designed to play with light.

SWAY CONCEPT

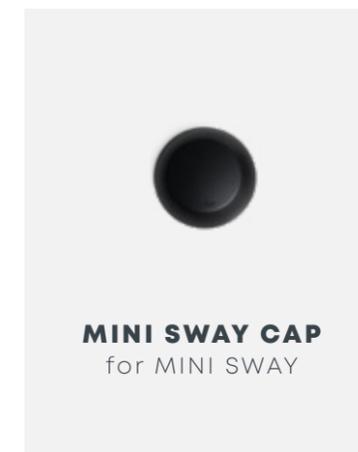

The SWAY concept offers path lights, wall lights, pendant lights in two different colors and a table light. It is designed from the idea that a fixture can be one with nature, so it does not always have to stand out. The minimalist design results in an elegant, friendly look that is very contemporary.

The SWAY lighthouse is available in two different sizes and colors. This makes them perfect for combining in creative ways. The pendant light is also available in 100-230V fixtures.

RECESSED LIGHTS

BIG FLUX

Recessed light BIG FLUX is ideally suited for illuminating tall elements in the garden. The light range is between 6 meters and 11 meters high. Choose from different ring colors Pearl Grey, Black and Stainless Steel.

PUCK

PUCK radiates light in all directions, making it the perfect choice for accentuating driveways and walkways. Its versatility invites creativity, whether illuminating stairs or adding a striking touch to walls.

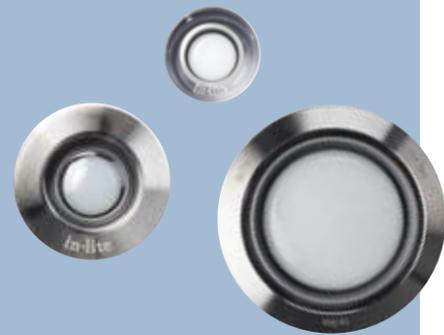

LUNA

LUNA (Light Under 'N Angle) is ideal for illuminating elements like walls, bushes, facades, fences and more. Its recessed profile is safe to walk, drive and use a lawn mower over. Making it a perfect option for illuminating objects from the ground up in a practical and beautiful way.

FUSION

FUSION is the softest light from in-lite. Want something truly unique? Combine the various sizes to create your own "starry night" effect. FUSION is fitted with the diffuse lens to ensure that the light does not glare. Available in: 60 mm and 22 mm.

EVO GROUND

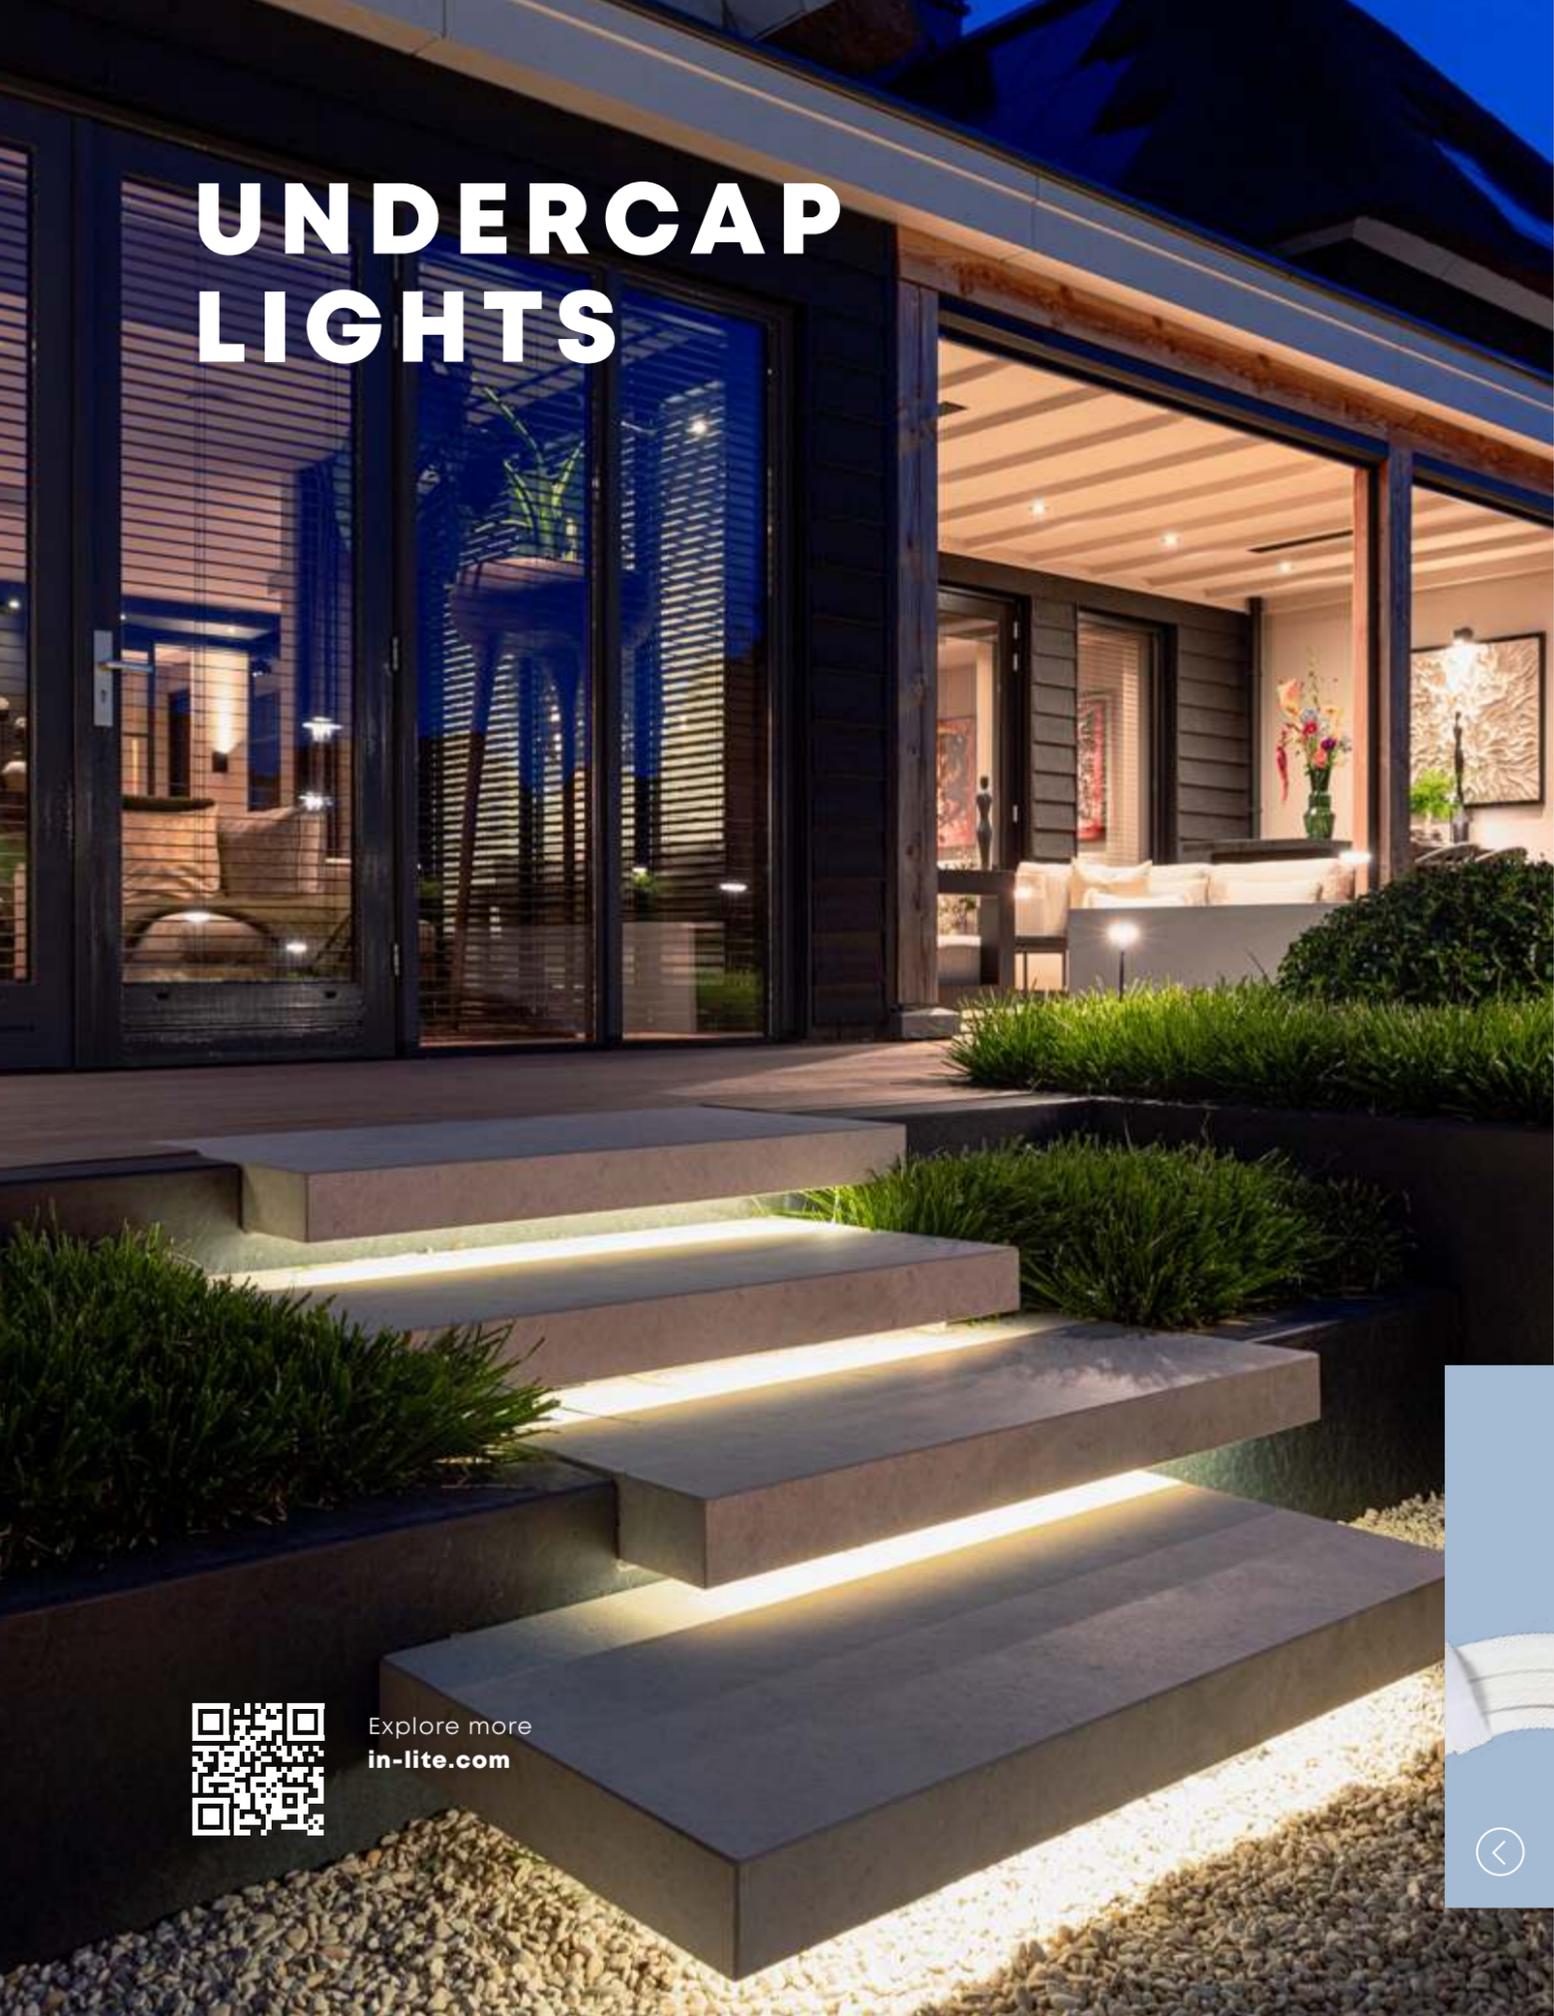

EVO GROUND combines sleek architectural design with unmatched versatility. Perfect for seamless integration into paving, the EVO GROUND creates clean, sophisticated lines of light that elevate any outdoor space.

HYVE

HYVE luminaires provide a striking yet atmospheric light image. Due to the honeycomb lens, the light is bright and sparkling. The spotlights, available in three variants, are ideal for paths, terraces and driveways.

UNDERCAP LIGHTS

EVO HYDE 180C EVO HYDE 550

EVO HYDE's indirect line lighting is placed under steps, decking, railings and (seating) walls. The lighting effect is special and functional. EVO HYDE available in: 180 mm (7") and 550 mm (22").

EVO FLEX

EVO FLEX LED strips are the ultimate solution for creating stunning linear or curved lighting effects. Whether accentuating stairs, benches, or pergolas, EVO Flex transforms them into true eye-catchers. EVO FLEX is available in both warm-white and TONE lighting.

HALO DOWN

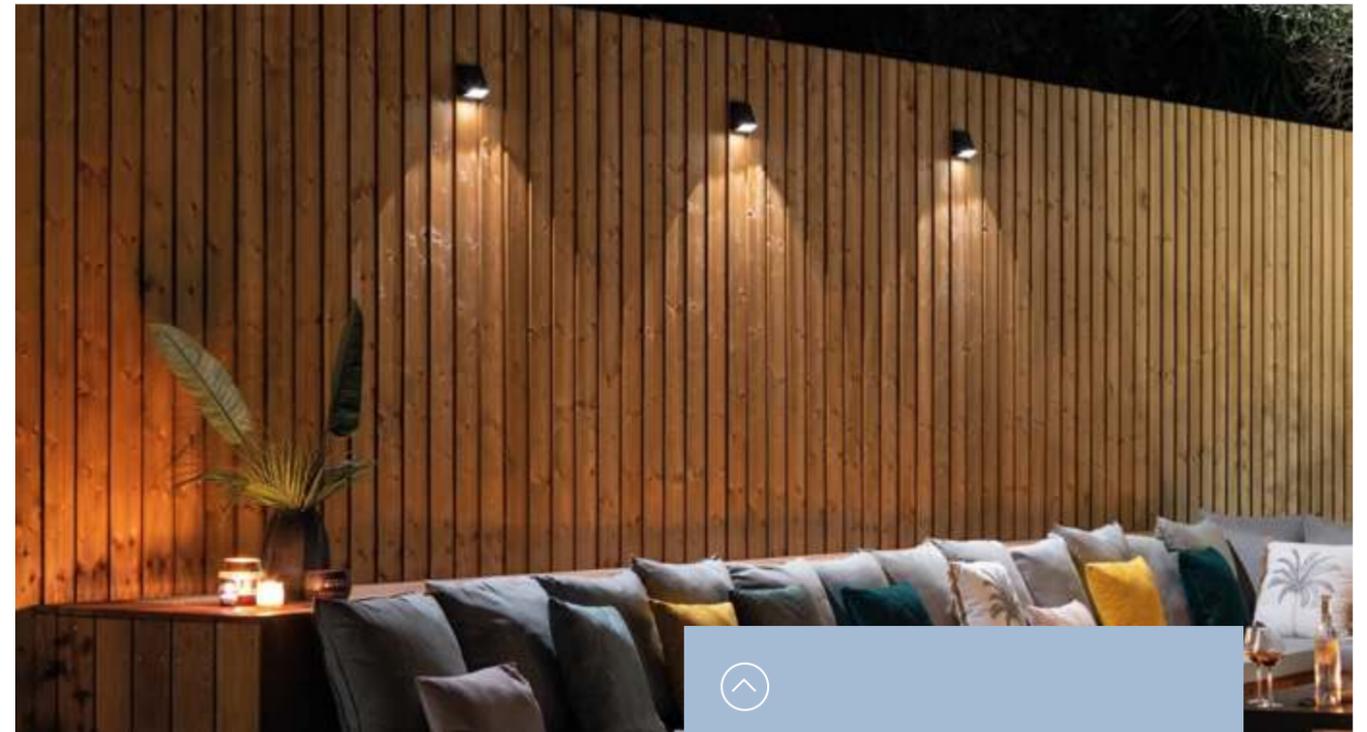

HALO UP-DOWN

HALO

HALO DOWN is a chic and robust wall light with a sleek wide light pattern on the wall and an atmospheric diffuse light image on the ground. Also available in 100-230V. Ideal for fences, privacy screens and pergolas.

MINI WEDGE

WEDGE SLIM

WEDGE

Square wall fixture made of coated aluminum. Provides indirect bundled Warm White light. WEDGE is available in three colors: Dark Grey, Rosé Silver and White. Ideal for deck posts, stone pillars and deck skirting.

ACE DOWN

Wall fixture ACE DOWN provides a directional beam of light and is suitable for mounting on a wall or fence. The light source is located deep inside the fixture so the light does not glare. The light from ACE DOWN can be adjusted in width with the separately available SHUTTER 1.

SPOT LIGHTS

SCOPE

Spots from the SCOPE series can be used to light up the smallest plant to the biggest tree. Visit our website and discover the full SCOPE range and their lighting specs.

AIM

Perfect for lighting borders and paths, AIM features a modular connection that supports up to three light sources. Its unique 360° rotation allows you to direct light precisely where it's needed.

BOLLARDS

NAIL

NAIL is an elegant bollard, available in 2 heights, ideal for atmospheric lighting of garden paths and borders. With a soft, all-round shining light and a very high CRI of 96, NAIL LOW provides a warm ambiance without glare.

VOQUE

VOQUE is a beautiful lighting element with a stylish design. Creates atmosphere on your terrace or lounge area. By combining with BIG VOQUE you create a beautiful eye-catcher for your garden.

DISC

The DISC concept focuses on curves and soft shapes, incorporating clear elements from nature. The concept consists of standing, hanging and wall lamps.

CHOOSE YOUR TRANSFORMER

Choosing the right transformer is critical. Most importantly, you need to have enough capacity on your system to hold all your fixtures. But you also want to be able to choose your personal preferences, like the operation. The differences are shown in the diagram here.

	HUB-100	SMART HUB-150	SMART HUB-300
Maximum connection value	100VA	150VA	300VA
Control	Touch screen	in-lite app	in-lite app
Cable outlets	2	3	3
Cables can be operated separately	✗	✓	✓
All smart products can be connected	✗	✓	✓
All non-smart products can be connected	✓	✓	✓*
Maximum cable length of 14/2	40m / 131ft	40m / 131ft	✗
Maximum cable length of 12/2	60m / 197ft	60m / 197ft	✗
Maximum cable length of 10/2	80m / 260ft	80m / 260ft	160m / 525ft
Plug & Play	✓	✓	✓

*Except for all HYVE and FUSION products.

IN-LITE SMART

Since the introduction of the SMART HUB and in-lite app marks the dawning of a new era in which outdoor lighting plays an even greater role in our daily lives. The app for the SMART HUB was developed for iOS and Android phones. All smart products can easily be used in combination with a SMART HUB. With in-lite Smart, you are prepared for the future.

HUB-100

Transformer suitable for 100 VA installation value. The HUB-100 is operated with a touch screen and comes with a light sensor. MOVE (wired motion detector) sold separately.

SMART HUB-150

SMART HUB-150 has an installation value of 150 VA and comes with three lines that can be controlled individually using the in-lite app. Wireless motion detector (SMART MOVE) sold separately.

SMART HUB-300

SMART HUB-300 has an installation value of 300 VA and comes with three lines that can be controlled individually using the in-lite app. Wireless motion detector (SMART MOVE) sold separately.

THE IN-LITE SYSTEM

HUBS ¹

HUB is a transformer that controls the garden lighting. A choice of three different hubs is available: HUB-100, SMART HUB-150 and SMART HUB-300. Add up the VA value of your lighting to find out which transformer will suit your garden.

CABLES ²

The cable can be rolled out from the transformer and guided along the fixtures. There are three types of cables available: 14/2, 12/2 and 10/2.

CABLE SPLITTING ³

Want to split or branch a cable? Use a cable connector (CC-2) to split the cable plan in no time.

EASY-LOCK ⁴

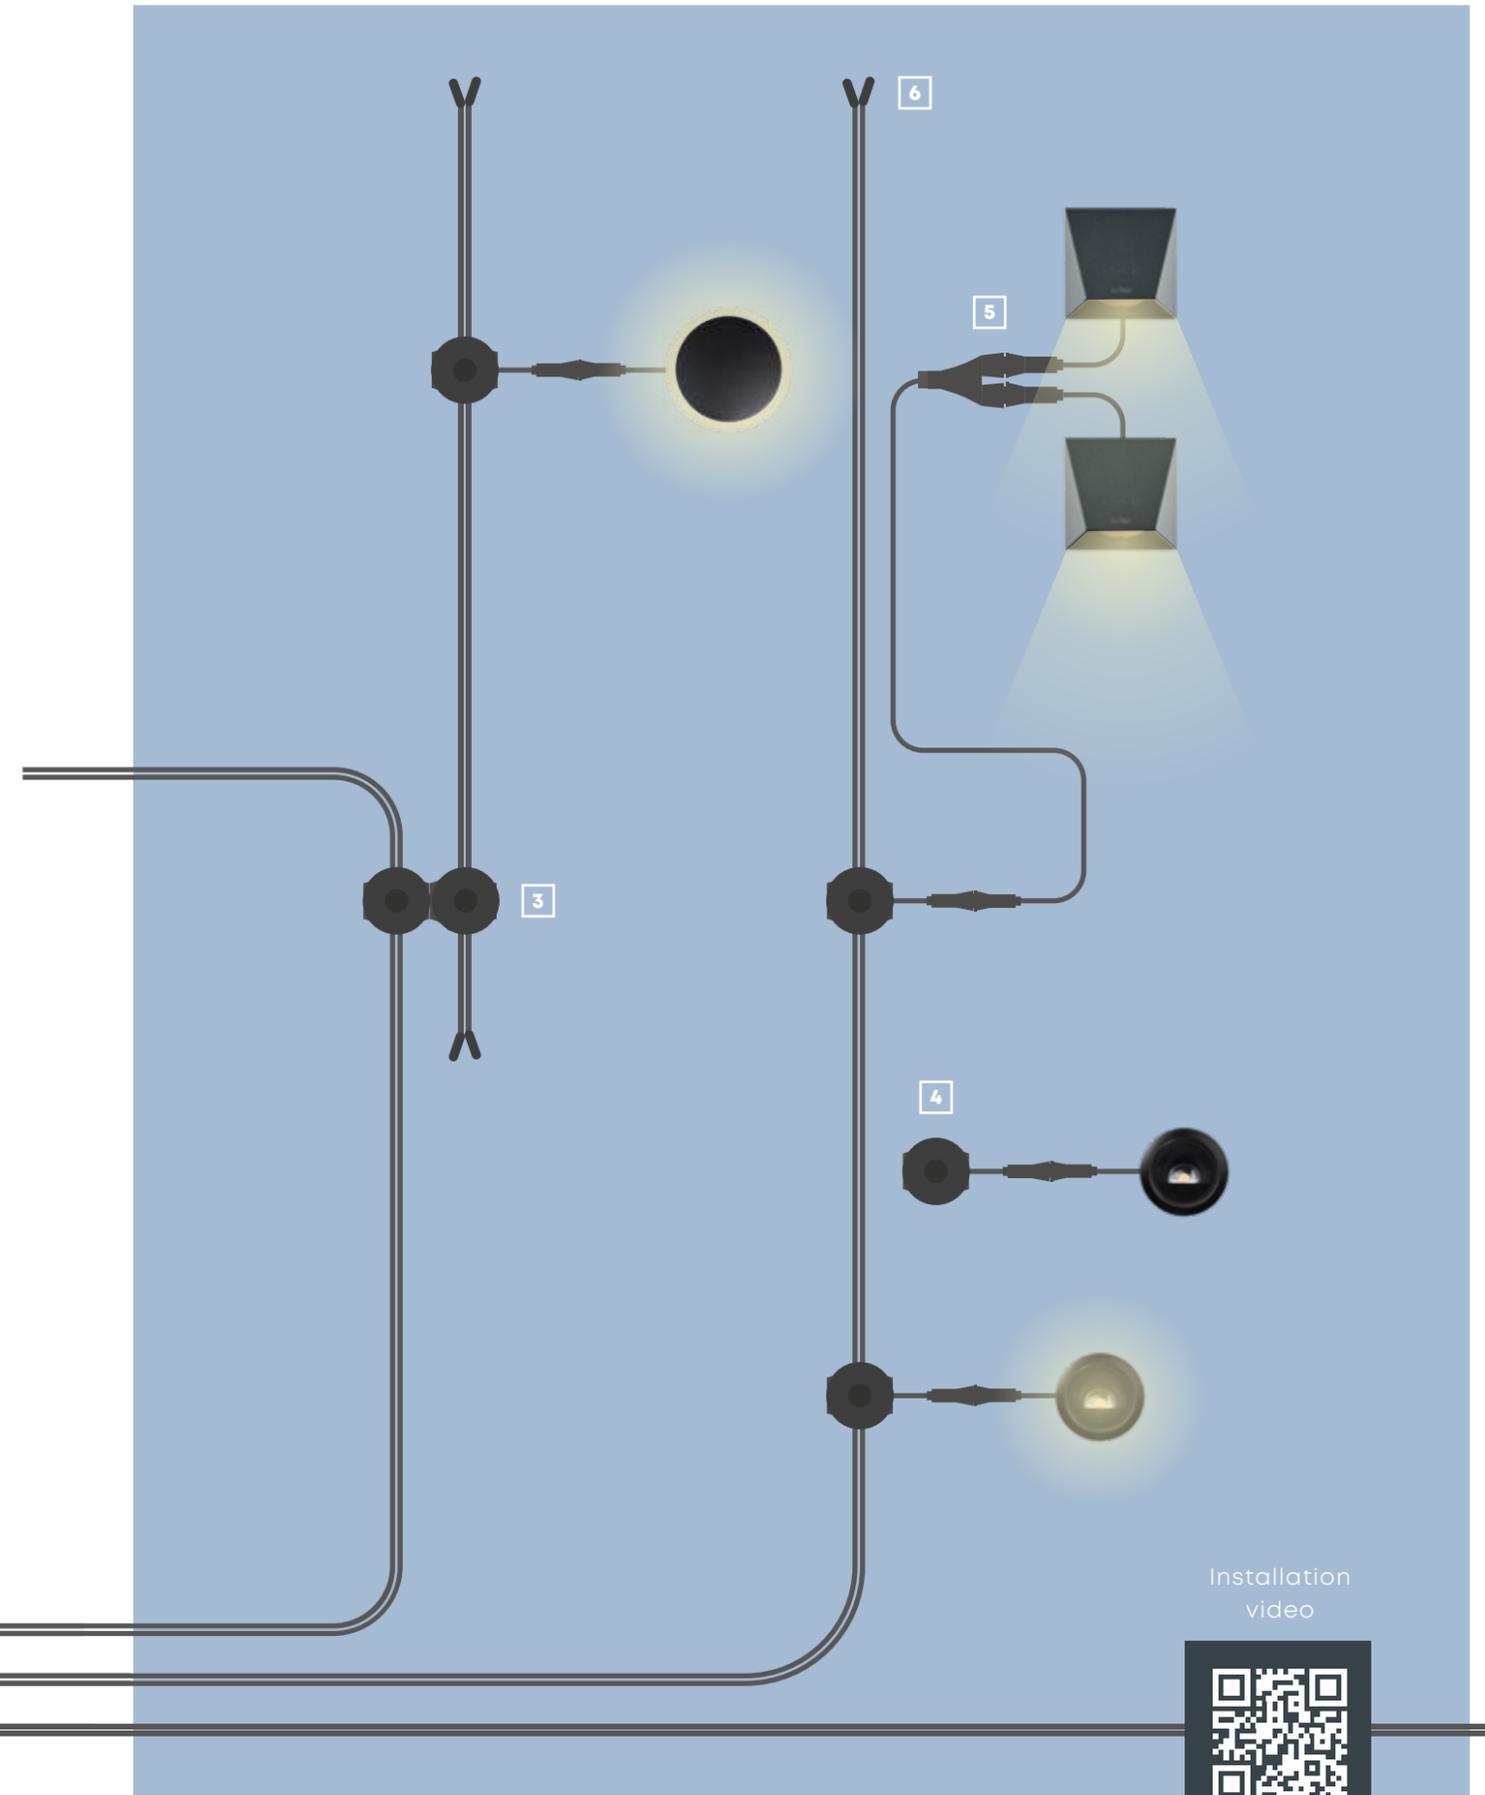

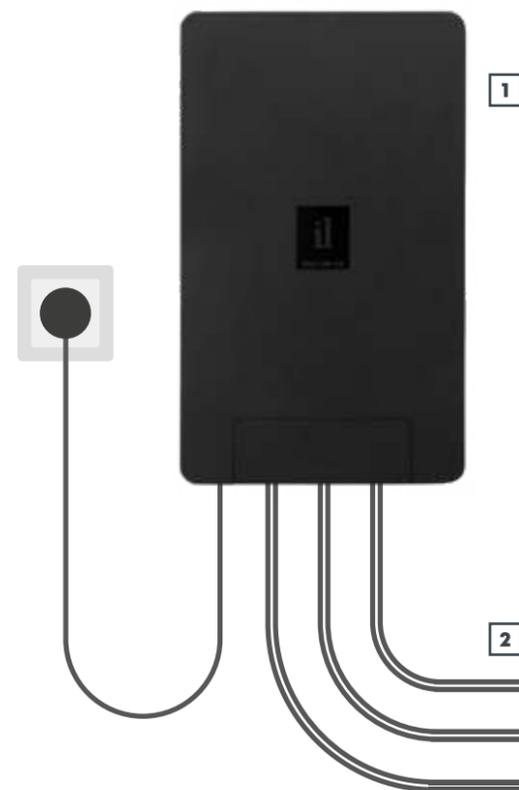

The in-lite EASY-LOCK connector allows you to connect an in-lite fixture to the main cable at any location.

ACCESSORIES ⁵

Is an in-lite fixture's cable too short? Simply use the extension cords. Another useful accessory is the splitter, which lets you connect two fixtures to one extension cord.

CABLE ENDS ⁶

The cable can end anywhere in the garden and does not need to form a closed system. Seal off the end of the cable with the cover caps provided to ensure that no moisture can get in and that the cable ends do not come into contact with one another. Thus preventing short-circuiting.

Installation video

SMART BRIDGE

More and more smart products can be operated remotely, using popular smart home systems such as Amazon Alexa, Google Home, and Apple HomeKit. These systems allow you to easily control all devices in your home. SMART BRIDGE enables you to connect your smart outdoor lighting to a smart home system. This way, you can control the garden lighting not only via an app but also with voice control. With Matter integration, your devices are compatible across multiple platforms, ensuring seamless communication and enhanced control.

- ✓ Integrate with home automation systems
- ✓ Control your lighting from any location in the world
- ✓ All smart products always up to date

TOUCH DIMMER

With TOUCH DIMMER you can easily dim your 12V wall, ceiling and pendant lights in five settings. The fixtures you connect to the TOUCH DIMMER can be operated separately from the rest of the garden. You do not need a smart system for this dimmer.

SMART MOVE

Just like the SMART HUB, the wireless SMART MOVE can be controlled using the in-lite app through a Bluetooth connection. Once movement is detected, the light can be set variably to stay on from 1 to 60 minutes.

SMART HUB PROTECTOR

The SMART HUB PROTECTOR has been introduced to further protect the in-lite SMART HUB transformer. This accessory extends the life of the product in harsh weather conditions if it is not possible to install the SMART HUB in a covered area.

IN-LITE APP

The introduction of the SMART HUB to the in-lite product portfolio means the beginning of a new era in which outdoor lighting is fully integrated into our lives. The app for the SMART HUB has been developed for iOS and Android smartphones and allows you to set up and save all features of the SMART HUB, and to share them with other users of the in-lite app. Download the app and discover the world of SMART.

CREATING GARDENS

IN PHASES

The unique in-lite system makes it possible to expand your lighting step by step. You start by installing a sufficient number of cables in the garden and over time, you simply add new fixtures as desired. Your dream garden will be a reality in no time!
